

Kate Mathonsi testifies of the miraculous healing power at work in Hope Family Centre.

FIRSTNAME:
KATE
LASTNAME:
MATHONSI

She had been living with one lung for nine years and had tried countless times to get a lung transplant, with no success.

She started coming to Hope this year and on one Sunday, Dr Bright noticed her in the congregation and called out to the front. He prophetically spoke into her life and accurately revealed to her that she is sick because she has one lung. After prophesying into her life, Dr Bright prayed for her and declared that God is blessing her with a new lung. After two weeks, she came back to Hope Family Centre and testified that she went back to her Doctor and he confirmed that indeed she has a new, healthy lung. The Doctor was also shocked to see that although she has a new lung, she didn't undergo any operation and there is no scar in her body to prove that she could have been operated. What a miracle! God is still in the business of healing his people. No manner of infirmity is too big for Him. He has done it for Kate and He can do it for you too. Trust in Him and He will come through for you.
